

## CHAPTER NINE

### FREE ENERGY & PROGRESS

We have told you before that free energy is the reason why Air Force Intelligence is prevented from releasing the true story of the spacecraft.

Free energy cannot be piped, sent through wires, or sold in service stations. It is the power that manifests motion in each person. It is the power manifested by the Creator, for man to use, as his birthright.

This same energy that powers people, planets, spacecraft, atoms and suns; is the answer to the elimination of smog.

Smog control can only be attained by elimination of the cause of smog. The investigation of a way to stop smog is not by studying its effects, or to fine a few people who burn rubbish, or cause smoke from industry.

Smog control, as it is now, will never do anything but add another department to the political machines of the cities, counties and states. This is an added, and unnecessary burden on the already overburdened taxpayers.

All the State of California has to do to eliminate smog from smudge pots, is to pass a law effective in one year, outlawing the use of smudge pots. In one year all smoke from smudging would cease.

Of course the principle of free energy as presented in this article is going to eliminate the sale of smudge oil by the oil companies. I am not bringing this information out because I do not like the oil industry. They have been responsible for some of the greatest contributions to the progress of this civilization.

Progress, however, requires the elimination of many old methods for the advent of new and better methods. The horse and buggy went — to be replaced by the automobile. The automobile made the need for oil companies. Now if the people in the oil companies are smart, they will get into the manufacture of free energy devices. Because as sure as you are reading this article, the oil company products are going to be replaced by free energy. They can't sell the energy, but they can sell the apparatus required to use free energy. The time is near when oil will only be used for lubrication and soon that too will go with the development of bearings that require no lubrication.

Progress is not a respecter of authority or industry.

I recently spent some enlightening hours with two wonderful people. One of them is Mrs. Hazel De Land, the other is Mrs. Eva B. Hibbs. (These two women live in Riverside, California.)

Mrs. De Land is the widow of Mr. John De Land. John was an amazing man who lived to perfect the "De Land Magnetic Control." This is a simple apparatus that prevents freezing in citrus and other fruit on sub-freezing nights. *It costs nothing to operate!*

Mrs. De Land told me how John received the details of the apparatus. John used the same means of thought reception 17 years ago that I use today. He heard a voice speaking inside his head, describing how to control frost and fruit freezing by a new method. John wrote the information down a little at a time, as it was given to him. Then he spent the next 15 years developing and proving true the information.

He has left a monumental contribution to humanity in his "Magnetic Control."

The drawing is made here of the principle of the device that John De Land gave to humanity, because he believed in progress. Mrs. De Land holds the patent papers on this apparatus. This drawing (fig. 3) is reproduced with her permission.

There are seven #10 bare copper wires, running radially out underground from a 32 foot pipe mast. The pipe mast tapers up with reducers from 2 inch diameter, through 1½ inch diameter, to 1 inch in diameter at the top. Three plywood disks 12 inches in diameter rest on each of the reducers. Each plywood disk has seven equidistant holes for the wires to run through. At the top disk the seven wires are wrapped once around the edge at each hole, and extend outward 4 inches parallel to the ground. Each wire points parallel radially, back to its own other end underground. The mast, which is 32 feet above the ground level, sets in a 3 foot depth of concrete. The wires run through the concrete and loop back up outside the concrete to a depth below the surface that will permit a plow, or any cultivation equipment to pass over them.

Each of the seven wires extend radially underground to a distance not to exceed 144 feet from the mast. At this distance they are wrapped 10 turns around a 1 inch diameter by 5 inches long alnico 5 magnet.

The magnet sets inclined toward the mast at 45 degrees to the surface of the ground. It is also buried below cultivation equipment level.

These magnets are made up and coated with one-eighth inch of plastic to hold the windings in place and prevent rusting. The magnets are set polarized to the North magnetic pole parallel to the lines of magnetic force.

No smoke — no dirty laundry — no expense to operate — nothing but the expense of the original installation. This device is that simple!

This single unit will prevent freezing of fruit over an area of more than an acre of ground. *This is free energy in operation.*

Figure 3

Anti Frost Control

Now for the proof of the successful operation of this control. This is where Mrs. Hibbs comes into the story.

Mrs. Hibbs had the foresight to permit the De Land apparatus to be installed on her land. Mrs. Hibbs came from Iowa and bought an orange grove. She didn't know until after she bought the property that the trees were considered "grown out," or beyond their age of producing an average crop.

Her caution only permitted the installation of five units of the "De Land Control" on five acres of her ground. After the first winter proved through freezing temperatures that the control worked, she had her entire 10 acres protected.

She proudly showed us around and compared her oranges with others for color, sweetness, and size. The "grown out" grove has increased its production every year. The crop had just been estimated by the packers before we visited Mrs. Hibbs. This year's crop will go nearly four times the average production per acre.

Mrs. Hibbs was forced to buy \$400.00 worth of 2" x 2" props to support the limbs on her trees.

Not only has Mrs. Hibbs increased her profit each year from the crop, but she has saved \$3000 worth of smudge oil in 5 years.

The saving in oil alone has payed for the installation of the free energy equipment. So over a period of time free energy pays for its own installation and cost.

Mrs. De Land said her husband John never did find out what makes the installation work. So I went back to our friends the spacepeople, through thought transference, and asked them to explain the principle. This is their explanation.

Trees manifest life but they do not manifest motion. Temperature is a result of molecular motion. The only motion manifested in a tree, or its fruit, is by the electrons in the atoms of its composition.

On a planet that rotates there are four periods each day. These are the positive quarter from 6 A.M. to 12 noon; the active quarter from 12 noon to 6 P.M.; the negative quarter from 6 P.M. to midnight; and the rest quarter from midnight to 6 A.M.

Atoms in free space are charged continuously. Atoms on a rotating planet are only charged according to their opposite polarity period.

As a negative electron rotates faster in the positive and active quarter of the earth's daily rotation, it manifests more heat due to the resistance of polarity opposition.

As an atom on the planet moves into the negative quarter, its electrons have no polarity opposition and they begin to discharge. As the electrons move into the rest quarter they discharge part of their energy

and this in turn causes a slowing up in their orbits around the proton. An electron can be stopped in its orbit by extremely low temperatures, which removes its charge. The magnetic canopy of the "De Land Control" helps the electrons to hold their charge by keeping them in motion.

This is definitely proven in the "De Land Control" on Mrs. Hibbs' property. An orange on the tree does not freeze despite the fact that a thermometer inserted into the orange shows the temperature is much as 7 degrees below freezing. As long as the orange is on the tree it is part of the life process of that tree. Any orange that falls to the ground inside the control area will freeze. This is because it stands out with earth and its electrons therefore slow up in their orbits.

The temperature inside of the control area reads just as low on a thermometer as the temperature outside of the control area, yet the orange on the tree does not freeze.

Mrs. Hibbs has recorded temperatures as low as 19 degrees inside and outside the control area at the same time.

Put free energy to work, save money and stop your smudge contribution to the smoggy condition that is a disgrace to California.

To the officials of the United States Government, the State of California, the counties and the cities of California, here is your answer to a large bulk of the smog condition; not by appropriations for more investigations.

For the rest of the smog from automobiles and industries, free energy sources and methods are the answers; not filters or fines.

Bring the free energy mechanisms out of hiding and release the principles of the spacecraft power for the progress of humanity. Stop spending money on atomic bombs and trying to destroy humanity. Spend the people's money for progressive things.

Change is not always progressive but progress is always change. All densities of life contribute to the progression of every form of life and densities beneath them. All forms of substance are alive in repetitive patterns for their particular species and span. Thus every substance, through life, repeats its cycles "from dust to dust."

Life is the carrier of progression in its eternal

endless spiral. Thus the stages are positive

negative  , or both  when they are in

balance.

The spiral of life (also called caduceus) is symbolized by two serpents: . The negative, receptive or female  is only given desire by its opposite  the positive, projective, or male counterpart and vice versa. These symbols are not zigzag in form, they are spiral. They are centered and separated by the "staff of life"  around which they twine ever upward through the Infinite Intelligence.

The first density, consisting mainly of vegetation, is of both polarities. The dividing line is the surface of the earth. The positive part of the plant is attracted to the dark negative soil to provide minerals and moisture so the receptive female portion above the surface may "bloom in her fullness."

This is the reason why a water witcher's twig, taken from a living plant, can indicate water. It is actually a living instrument. Like magnets when they are cut, the positive end remains in the same direction. Therefore they are held upside down in order to function. As all things beneath the surface of the soil are of negative polarity and since the survival is the strongest desire, the twig wants to assume its natural polarity-position and is attracted, positive butt end first, to the "water of life."

For the same reason, when you spend long periods of time in the positive sun, you require more water which is negative — to quench your thirst which is the result of unbalanced light force.

Every cell in the vegetation is life in form maintaining still greater life in form. As an animal eats the first density (Stationary life form vegetation), it gives to it motion.

The substance confined to the place where the seed dropped can now move around, as it has been assimilated by and raised to the second density (Life and Motion).

The same progression of substance takes place when you eat the flesh of an animal. Humans being both animal, and spirit, and having life are of the third density (Life, Motion, and Consciousness).

You, as part of the eternal pattern of life in form, give to the animal substance — the ability to talk and recognize the spirit.

Although all forms of life progress within their own densities, much confusion has been started by the theorists who try to tie the densities

together. Darwin tried to show the evolution of man from the apes. There is no missing link — unless I'm it.

As our solar system has progressed through space — a living functioning part of the eternal life pattern — it crossed the line on August 20, 1953, from the third density to the fourth density.

Our planet has emerged from the frequency of the third density. Everything on this planet must now begin to conform to this higher frequency pattern.

Rest assured, we are going to emerge from the pattern of destruction or be destroyed by it. The fourth density will only support life forms that qualify to live in it.

The fourth density does not support a monetary system nor authority by power. It will be increasingly evident that the subtle light of freedom is awakening in people. Those who have succeeded before through subterfuge and brute force are going to find that the old "right by might" doesn't work any more.

We are on the verge of witnessing a cyclic planetary housecleaning. All things in this solar system are going to be brought into balance.

You can prepare to live in the new grade in the same form or go back to the third density and take the grade over again.
